

Securely process payments from your desktop or tablet

Bolletta Cashier... a solution that gives you the ability to convert any internet-enabled computer or tablet into a point-of-sale system.

Bolletta Cashier gives your office staff the capability of taking credit card, debit card and echeck payments quickly, easily and conveniently. It can be used to process any type of payments you collect. For painless recording and bookkeeping, Bolletta Cashier integrates with many Accounts Receivable systems.

To make payment processing even easier, combine Bolletta Cashier with a card reader and/or a MICR reader. Swiping a card or scanning a check avoids the hassles and errors of manual entry. When paired with a Heartland E3™ card reader, PIN pad or terminal, Bolletta Cashier is one of the safest, most secure POS solutions in the industry.

With our comprehensive online reporting site, your staff will have real-time access to every transaction processed through Bolletta Cashier, and daily, weekly, and monthly reports can be created quickly. Plus, reports can be automatically sent to your inbox each day in the file format of your choice, consolidated by batch, channel or other data field. Featuring a role-based hierarchy, our solution provides authorized staff members with the ability to void payments and process full or partial refunds.

For added flexibility, Bolletta Mobile Cashier offers virtually all the same features as Desktop Cashier on a tablet based app. Usable anywhere with internet access, you can even integrate a Bluetooth card reader and printer.

Features and Benefits

- Quickly process in-office credit and debit card and echeck payments
- Next business day funding available
- Industry best security through Heartland's E3™ technology
- PCI-DSS Level 1 certified
- Simple end-of-day reporting
- Role-based employee features
- Payment void and refund functionality
- Secure online access to full transaction reporting
- Multiple funds settlement accounts available
- No "middleman" transaction processing fees

The Bolletta Product Suite is completely integrated—providing you with systems that work together seamlessly for the ultimate user experience. In addition, our U.S.- based customer service team is extremely responsive, with an average live-person call answer time of less than six seconds.

As one of the largest payment processors in the U.S., Heartland provides you with system security and reliability that is second to none. In 2012, our Level 1 PCI certified payments platform processed more than 3 billion transactions and \$120 billion in volume.*
