 - ✓ Auto Close or manual batch closing
 - ✓ Live customer support, 24 hour, 365 day with staff who understand your business and are experts in payment processing
- **Secure** – Mobile ECR utilizes AES-encrypting readers to keep your transactions secure. All transaction data is encrypted in transit, so clear card data is never stored on your mobile device. The app is designed and written to the PCI PA-DSS compliance standard!
 - **Cost-Effective** – There are no middlemen, outside gateways or third party providers to increase your costs — you get everything you need from one source.
 - **Reliable** – Heartland Mobile ECR is a native iOS app, built by Heartland, one of the most trusted names in payments processing, with years of experience in mobile payments, so you know it works
