

Realex Hosted Payment Solution

- Less compliance costs, more control
- Simple Integration
- Maximize conversion

Control your website payment experience while reducing compliance scope

The Realex Hosted Payment Solution delivers complete control of the end-to-end payment experience on your website for a seamless checkout, while helping to reduce your PCI DSS compliance efforts and associated costs.

Accepting payments has never been easier, with a choice of PCI DSS compliant integration methods that each deliver a seamless, customizable payment experience to maximize conversion. We deliver a payments page that adapts to any device so your customers flow easily through the buying process on desktop, tablet or mobile. It is also fitted

with helpful prompts, such as automatic card type identification and real-time form validation to help maximize conversion. Our payments technology is secure and reliable with 99.99 percent uptime and dedicated support.

We take care of your online payments completely within our PCI DSS compliant environment, so you don't need to handle, transmit or store sensitive card details; helping to minimize your PCI DSS requirements and costs.

Simple Integration

Less compliance costs, more control

Maximise Conversion

Heartland

Less compliance costs, more control

The Realex Hosted Payment Solution enables you to retain total control of the payment experience on your website, without the associated PCI DSS compliance costs.

Customize your payment page

You can easily customize your payments page by modifying the HTML or CSS to reflect the look and feel of your website; delivering a consistent customer experience while maximizing conversion.

Store cards in a secure environment

We take care of your online payments completely within our PCI DSS v3.2 compliant environment, so you don't need to handle, transmit or store sensitive card details; minimizing your PCI DSS obligations and costs.

Control your online payments

We provide the tools you need for transparent reporting in real-time to help you reconcile transactions, with the ability to search, void and refund your transactions easily.

Simple Integration

Integrating with the Realex Hosted Payment Solution is simple and your dedicated account manager will help you every step of the way.

Integrate easily with three hosted checkout options

You can embed the Hosted Payments Page in an iFrame within your website, overlay a lightbox or redirect your customers to a dedicated payments page.

Reduce development costs

Regardless of which option you choose, we maintain a suite of SDKs, quick guides and shopping cart integrations, which vastly reduces development times and costs.

Easily integrate beneficial additional services

Choosing the Realex Hosted Payment Solution opens up the opportunity to add a broader range of services: Card Storage, Fraud Management, Dynamic Currency Conversion and Alternative Payment Methods with little or no integration work.

Maximize Conversion

Our Hosted Payment Solution delivers a payment page that is designed to maximize conversion through best practices.

Accept payments across every device

We deliver a payments page that adapts to any device so your customers flow easily through the buying process on desktop, mobile or tablet.

Create a smooth user experience

The Hosted Payment Page is fitted with helpful prompts on your payment page, such as automatic card type identification and real-time form validation to maximize conversion.

Enable customers to store cards

We help strengthen customer retention by offering your customers the option to securely store their card details on your Hosted Payment Page, delivering a one-click checkout experience for returning customers. Customers can add, edit or delete their own cards, with details stored within our PCI DSS v3.2 Level 1 compliant environment.

Reach international customers with ease

As you scale locally and globally, we help you sell beyond borders with a checkout that adapts to more than 15 languages, along with Multi-currency and Dynamic Currency Conversion (DCC) to reach new markets.

Access our latest payment innovations immediately

Our in-house user experience team continually enhances the Hosted Payment Solution with new innovations that optimize your conversion rates for both one-off and repeat customers.
