

Heartlandportico

Virtual Cloud Terminal

With a complimentary **Portico Cloud Virtual Terminal**, you can process payment card transactions quickly and securely, from Windows-based PC or laptop with internet access. Whether you sell online, over the phone, through the mail or from a storefront or office, Portico VT provides a cost-effective means to accept payments by replacing expensive stand-alone terminals requiring dedicated phone lines, all while being **HIPPA and PCI** compliant.

- Process payments securely using a Heartland Secure™ EVM peripheral which addresses the liability shift and includes Heartland's unmatched breach warranty – protecting your customer's card data and you from hackers
- Accept mail order/telephone order payments via keyed entry for and eCommerce payments
- Setup recurring billing schedules for membership fees, club dues, subscriptions, and gift card top up with flexible schedules. Card-on-file allows for acceptance of payment at any time, with customer acknowledgement. Email notifications to customers keep them informed— improving customer relations
- Receive fair pricing and full disclosure of card processing fees with no middlemen, outside gateways or other third parties to increase your costs
- Streamline transaction acceptance with the virtual terminal's intuitive user interface and easy to navigate menu of services
- Protect sensitive cardholder data and transaction information with administrator control of individual user access
- Export current or historical transaction data in a variety of formats with easy-to-use reporting features
- Future-proof your payments processing with a virtual terminal solution designed to

Plus, you will benefit from Heartland's award winning U.S.-based, 24/7/365 customer service and one-call resolution policy.

Heartland Secure PIN pads help you reduce PCI scope and ensure optimal transaction security through use of EMV, end-to-end encryption and tokenization technology that begins the moment the customer's card data is swiped, and throughout the authorization process.
