

Realex API

Quick, seamless integration options for full control of the online payment experience

With the Realex API, payments are hosted on your systems, with transaction and customer payment details transmitted to Global Payments for processing. You maintain full control of the customer payment experience, from end-to-end, for a convenient, seamless shopping experience on your website.

The Realex API Integration is simple. With our quick guides, SDKs and shopping cart plug-ins, you can complete your integration in as little as five minutes.

Key Features for Business

- Integration options to suit all businesses
- Access to expert technical support
- A suite of management requests is available - void, rebate, settle etc.

Key Features for Developers

- Integrate with us in five minutes
- Open source SDKs & API libraries on GitHub
- A wide range of shopping cart plug-ins
- Access to expert technical support

Support for all major shopping cart platforms:
